We encourage the exchange of art and expertise between SMK and American institutions, and foster support for SMK globally.

Your support means that we can advance our arts programs in the United States and further develop collaborations across borders. A partnership will help us to create an international space where we can promote understanding and enjoyment of Danish art for all.

"Art is an incredibly effective medium of communication and a tool for bringing people together. For me the strengthening of ties between Denmark and the US is an incredibly attractive goal. By supporting AF SMK I feel I am contributing to bringing our two countries closer in our mutual appreciation of art and culture."
